UNDERTAKING.

THE UNDESSESSIONED HAVING A complete stock on hand, is now prenared to execute any order therewith, on the shortest notice and on the most reasonable terms.

The Infallible Bamedy.

Colloway's Cintment. Contracted or Stiff Joints. Contracted or other solute.

All the medicines in the London dispensaries would barely benefit, much less cure, any ch-onic cases of contracted or stiff Joints; whereas if this invaluable ointment be effectually rubbed into sub-parts twice a day, the effects will be immense. Paralytic patients even can derive advantages from this fine remedy when other means fail.

Scorbutic Humours,-Scald Head and Skin Discares.

Scorbutic humors arise from an impure state of the blood, and in most cases the liver and stomach are the organs at fault. The Pills will specifyly restore these to a healthy action; while the Ointment if well rubbed in at least wice a day, will soon cure any case of skin disease. Soldiers, saiors, and miners, use famous Ointment in all parts of the world.

Disorders of the Kidneys. Stone and Grave In any of the above complaints more benefit may be derived in twenty-four hours by adopting the following simple means than is frequently brough, about in six months by any other treatment. In bad cases if the Unitment be rubbed into the small of the back over the region of the kidneys, it will quickly penetrate, and, in most instances, give immediate rehet. Six or eight of the Pills should be taken nightly according to circumstances.

Diptheria, Sore Throats, &c.
These maladies are of so serious and dangerous a nature that the Ointment would not be recommended unless the Proprietor was sure of its effect. It will cure when every other and and have failed, if applied immediately, and not have failed, if applied immediately, and or recovery. It is expressing the patient is beyond recovery. It is expressing will be promptly removed by rubbing it his unquent. Mothers should rub it into the chest of heir infants whenever there is any hortesness, ightness, or other affection of treathing.

Bad Legs, Bad Breasts. Old Wounds, Sores

Gott and Rhoumatism.

Will be cured with the greatest certainty if large mattites of the Oliment be well worked into the complaining parts. This treatment must gisveringly followed for some time and duly sisted by powerful doses of Hollowsy's Phils, ich has floating through

Both the Ointment and Pills should be used in the following ccsss:

AN INDUSTRIAL PURSUIT. A few days ago our evening contemporary called attention, in a well-timed article, to the fact that while commerce was suffering depression in Victoria, Nanaimo presented more flourishing indications than it had ever displayed before. The contrast here afforded explains more forcibly than we can well say the folly of staking our all on the single turn up of the uncertain die of Cariboo, and proves, what we have all along maintained, the advantage of having more stable occupations in the country than gold mining and commission agencies. We cannot of course turn Victoria into a coal mining community if nature has not given us the mineral, but we can, at least, by following out a policy more in accordance with our position, enable the country to sustain, without material injury, any reverse which an insufficient yield of gold may occasion. From first to last-from the exposition which we gave in January o the falling off our trade till the present time-we never for a moment blamed the mistaken commercial policy of the country for the reaction which had taken mining was the cause of our sudden seaworthiness when the storm set in. With

place; because as the success of gold prosperity, so the temporary decline of the mines was the cause of the commercial de-pression; but we did blame it for its total unthe partial failure of Cariboo came a number of unemployed men, and even unem ployed capital, but there was no out-let for either. We had tied ourselves down to selling pork and beans, and when the mouths decreased in number we were left helpless either with large stocks in hand or large debts that were not likely to become remunerative. The "bone and sinew" had to depart, and the present year witnessed a very considerable diminution in the numbers that went to Cariboo. Now in any other country this would have been a sufficient lesson to those who had a mercantile interest at stake. The commercial portion of the population would have seen that a policy which was only safe in fair weather was not suited to a colony subject to all the ups and downs of a gold-mining life; but our mercantile men were hopeful, and expected " geographical positions" to work some of the biblical miracles. The miracles, however have not been performed, and no men have suffered more by our commercial policy than those who have clung to it in sunshine and adversity, with all the ardor of unsophisticated youth. Fortunately in the crude state of society in new countries an error in political economy cannot run long without bringing in its train the necessary evils, and so we have found, after a six years' reliance on a single resource, that it is necessary to change our base." We do not make these remarks with the view to legislate the country into more stable pursuits; for we are only too well persuaded that if the foresight and prudence of a population do not make them see the necessity of having a fixity and a permanence about their occupations no Act of Parliament will ever provide them with the necessary perception. Legislation may under proper direction give an impetus to a movement or a stimulus to an industry, but the people must first be educated to the proper utilitarian standard. At present, while men are shaking their heads despondingly, a fleet of vessel are awaiting their slow turn at Nanaimo t ship their cargoes of our mineral wealth. While coal is to be found in the vicinity of nearly every bay or estuary along the coast and while a market is open to us at our very doors, commerce shrugs its shoulders and looks infatuatingly towards the deceptive strata of Williams' Creek. In what other country could we find such absolute supine Here is Nanaimo called unon to fil orders for 7600 tons of coal, and some of the vessels will be actually obliged to wait over six weeks for their cargoes; and yet with all this demand for the produce of labor,

we have stalwart men walking the streets unable to obtain a day's work! And this is

the delightful result of that "commercia

policy" that has been telling every industry

to look not beyond the marvellous city of

Victoria for its sustenance. Had the mer-

cantile class, who really controlled the des-

tiny of the colony, shown that clearsighted

ness which in other countries is its peculia

characteristic, we should have had to-day

dozen Nanaimo's, and work for all the me

whom gold-mining misfortune had turned adrift. It is, however, no use to repine

especially when the future is really so hope

ful. If Vancouver Island commerce has

neglected its true interests, and the

practical and probably less pretentious ele-

ment. Another class has gone in to develop

the country's resources, and to them we are

indebted already for the absorption of a con-

siderable number of men out of the unem-

ployed population. The Queen Charlotte

Coal Mining Company has set an example

which we hope to see earnestly followed; i

has shown from its inception a marked energy

and determination to prove the paying char-

acter of its mineral property, and supply

what will be an unceasing want for all time to come on this coast. The coal discoverers

at Cowichan are also intent on bringing their

article as speedily as possible into market

In a little while, therefore, we hope that no

undue loss of time will be felt by San Fran-

. HE BRITISH COLONIST dustries thus created will not only have the effect of absorbing all the unemployed, but will give a stimulus to other undertakings of an equally permanent character, Let our nerchants and tradespeople only turn their attention more closely to the undeveloped wealth that lies around them, and we shall see no more reactions and hear no more despondency NEW ADVERTISEMENTS.
